

Internship Design Proposal

Submitted By

Student Name: Faiza Munir

Registration No: FA23-BSE-030

Program: BSE

Summer 2025

Submission Date: 20-8-2025

COMSATS University Islamabad, Islamabad Campus

1. Students' Career Goal

Briefly describe your intended career path within Computer Science (e.g., software engineering, AI/ML research, cybersecurity, data science, etc.).

I want to grow my career as a Full Stack Software Engineer, focusing on mobile applications

and backend systems. In the future, I hope to learn more about AI and cloud computing, so

I can build modern and practical solutions that use both smart technology and cloud

scalability.

2. Learning Objectives

Clearly define what you aim to learn during your internship. Align these goals with broader computing concepts such as systems design, programming practices, database management, cloud computing, or IT project management.

During my internship, I aim to strengthen my skills in Flutter and Dart while gaining practical

experience with Firebase and App-write. I plan to enhance my knowledge of full-stack

development, focusing on both frontend and backend integration. Additionally, I want to

improve my systems design and programming practices through real-world projects.

3. Internship Placement Overview & Role

Provide the name and a brief description of the host organization. Specify whether the internship is on-site, remote, or hybrid. Mention the functional area within the company (e.g., software development, QA, DevOps, IT support, R&D lab).

I am doing my internship at **Masihai Pvt. Ltd**, a technology-driven company revolutionizing

healthcare by connecting providers and seekers through a comprehensive digital platform.

My internship is **remote**, and I am contributing within the App Development

functional area. My work mainly involves using Flutter, Dart, Firebase, and

App-write for app development.

4. Supervisor Details

Include the name, designation, email, and contact number of your site supervisor at the host organization.

Name: Shayan Ahmed Mushtaq

Designation: Chief Technology Officer (CTO)

Email: cto@masihai.com

Contact Number: 0336-4822804

5. Scope of Work

Summarize the specific tasks, tools, platforms, and technologies you will work with.

5.1. Key Activities (check all that apply):

- | | | | |
|---|--|--|--|
| ☐ Coding | ☐ Testing | ☐ Documentation | ☐ Data Analysis |
| ☐ Research | ☐ Technical Support | ☐ Dashboard/Report Creation | |
| ☐ Other (please Specify) | | | |

5.2. Tools/Technologies to be used:

Programming Languages: Dart

Frameworks: Flutter

Backend & Database: Firebase, App-write

Version Control: Git/GitHub

Tools: Android Studio

5.3. Expected Deliverables:

During my internship, I am expected to contribute to app development using

Flutter. My tasks include developing and refining the frontend in Dart, implementing

backend functions, and integrating database operations such as fetching and

displaying records. I am also expected to fix UI issues, resolve data-handling errors

6. Academic Preparation

List relevant coursework or academic projects that have prepared you for this internship (e.g., Data Structures, Web Development, Artificial Intelligence, Software Engineering Project, etc.).

I have built a strong foundation in coding through courses such as Programming Fundamentals,

Object-Oriented Programming, Data Structures, Database Systems, and Software Engineering,

including Requirements Engineering. These courses enhanced my problem-solving, project management, and requirement analysis skills. My academic projects include Cart Saver, a

Flutter-based e-commerce cart abandonment solution, and Finverse, a Java prototype financial system focused on user accounts and transactions using OOP principles.

7. Additional Comments

Include any special considerations, expectations from the host organization, or observations you would like to share.

I am grateful to Masihai Pvt. Ltd. for providing me with the opportunity to gain practical exposure. Through this internship, I expect to strengthen my coding and problem-solving skills, familiarize myself with industry-standard practices, and build confidence by contributing to real-world projects.
